PRODUCT OVERVIEW

Aprima for Home-Based Primary Care

“With Aprima Replication, I don’t have to worry if I have an Internet connection or not. I visit my nursing home patients daily and never have to worry about having a connection on site. When I am back online, all the work for the day is automatically uploaded and I’m done.”

DR. KWON LEE, MD

WOUND CARE SPECIALIST FOR
NURSING HOMES AND HOME
HEALTHCARE PATIENTS

House calls are back and tens of thousands of Americans are receiving improved care as a result. But for traveling physicians, there’s a whole new level of complexity to these home visits, from new rules on documentation to achieving all the government incentives your practice is entitled to.

That’s why Aprima is designed to optimize your time at a patient’s home instead of complicate it. It works the way you want to work, with an interface that follows the natural flow of a typical patient visit. And it comes with unique functionality that gives you all the powerful benefits of an EHR and none of the traditional constraints.

KEY FEATURES FOR HOME-BASED PRIMARY CARE PHYSICIANS

- **HIPAA-compliant communication.** Messages can be sent quickly and securely to any person or group in the practice, just the way it’s done in an office setting.
- **Device integration.** Aprima interfaces with a variety of medical equipment, allowing clinicians to take many of the medical devices they need for patient care with them. Results can be documented in real time on site.*
- **Patient records access.** With the Aprima Patient Portal, patients, or family members with access rights, finally have secure, online access to patient visit results as soon as the doctor is back online. They also have 24/7 access to any chart data made available by the practice or provider.
- **Patient grouping capabilities.** The software has built-in capabilities to add a patient site or facility, and to group house call patients by site, geography, zip code and more.

*Customer received compensation as a referral and was told in advance that they would be featured in an advertisement.

About eMDs

eMDs combines leading technologies with tailored services to remove operational burden and empower healthcare providers to maximize the impact of their care. Founded by physicians, eMDs brings decades of expertise and understanding to our integrated electronic health records products, practice management software, revenue cycle management solutions, and credentialing services for medical practices and enterprises. With tens of thousands of deployed clients across a range of specialties and settings, eMDs' extensive experience allows us to craft proven, transformative, solutions that meet the unique needs of healthcare organizations, enabling unmatched productivity and a superior experience for patients and practitioners alike.

**Expert Solutions.
Stronger Partners.
Healthier Patients.**

STORE & FORWARD—WORK OFF-LINE, SYNC UP LATER, NO MORE AFTER HOURS CHARTING!

No Internet connection? No problem! Aprima lets you fully document patient charts, look up or enter data using your preferred form of entry – including handwriting, voice recognition, point and click and keyboard – and perform other everyday tasks, all without access to a network or wireless connection. Once connectivity is available, the system automatically transmits patient visit data, digital images, orders, results and more. We call this Replication – allowing real-time charting on a local device in any type of remote facility.

PAINLESS PAYMENT PROCESSING FOR CHRONIC CARE MANAGEMENT, CARE PLAN OVERSIGHT AND MEDICAL HOUSE CALL E&M CODES

Too often home healthcare physicians shortchange themselves on what they're rightfully owed by Medicare. The Aprima EHR removes uncertainty about CCM, CPO and Medical House Call E&M billing by recognizing:

- The patient received house call services required by Medicare in order to receive CPO reimbursement
- The physician or other clinician devoted and documented the required 30 minutes or more of his/her time to supervision of patient's care plan
- The physician provided a service requiring a face-to-face encounter with the patient in the 6-month period before CPO was billed
- Chronic Care Management tracking and billing is built into Aprima

In addition, Aprima supports and helps calculate all home services, nursing facility and rest home E&M codes, making it easy to bill for services.

LEVERAGE THE POWER OF APRIMA FOR YOUR PRACTICE!

By enabling fast and efficient documentation, Aprima EHR's built-in tools ensure that you'll spend time with patients, not computers.

NO TEMPLATES! Chart the way you were trained to think and follow the flow of your exam no matter what direction it may take.

Aprima EHR follows you, instead of making you follow it. Chart by symptom for fast documentation. Your past notes can be carried forward to the current note so you're not charting from scratch.

Adaptive Learning lets Aprima EHR learn your preferences as you work.

Enjoy a smart EHR that seems to read your mind, so you'll be up and running with minimal effort.
