

Streamlined appointment reminders

Managing rejected claims is even easier with CGM MEDISOFT v28.

Users can now add a resubmission code for the specific claims in question through the Claim Management screen.

The claim-specific resubmission code reduces the chance of being rejected for duplicate claims and could help them be processed even faster.

The old method of applying the code to an entire case is still available, so providers can go with the workflow that works best for them.

Upgrade to
CGM MEDISOFT v28.

Take advantage of these exciting new features, and see the host of other improvements we have made to better assist you in your revenue cycle operations.

Hard working practices. Powerful solutions.
